
The Dobsonian Telescope A Practical For Building Large Aperture Telescopes

dobsonian telescopes | orion telescopes: shop - more about dobsonian telescopes the dobsonian is a simple, low-cost telescope design popularized by san francisco amateur astronomer john dobson in the 1970s. it consists of a newtonian tube assembly riding on a simple, wooden altazimuth base. **introduction to the dobsonian telescopes** - introduction to the dobsonian telescopes one type of telescope that students in the astronomy class frequently use is a 10 - inch dobsonian telescope. these telescopes are medium-size, as amateur telescopes go (the amateur rage would be 4 to 20 inches in diameter); they are mechanically simplified for low price and ease of use. **plans for a dobsonian telescope - scope making** - plans for a dobsonian telescope 150 mm mount 200 mm mount at this point, you can also buy the tube, and the altitude bearings. for this telescope, you need a pvc drain tube. if you have a 150 mm f8 mirror, a 200 mm od tube is needed. unfortunately, the standard sizes are 1 and 2 meters in length. **how to build a dobsonian telescope - projectsplans** - plans for building a dobsonian telescope brought to you by: the san francisco sidewalk astronomers yes, it "looks like a cannon," but the above is really a ten-inch (measured by the diameter of the objective) newtonian telescope that almost anybody can build. **engineering lightweight dobsonian telescopes- 2013 update** - john dobson really started something with his dobsonian "dob" telescope design. he enabled the average amateur telescope maker "atm" to create a large and very stable telescope with common workshop tools. since then dob's have evolved from a heavy boxy structure to elegant lightweight designs with truly excellent optics. **instruction manual lightbridge plus truss tube dobsonian ...** - never use an unfiltered telescope to look at the sun! looking at or near the sun will cause instant and irreversible damage to your eye. eye damage is often painless, so there is no warning to the observer that ... using the dobsonian telescope. ... **plans for building an 18inch f4.4 dobsonian telescope.** - the following pages detail the complete set of plans for an 18" dobsonian based upon dave kriege and richard berry's excellent book. page 2 - book p117 - mirror flotation system and cell. page 3 - book p123 - detail of flotation system triangles and bars. page 4 - book p157 - secondary cage assembly page 5 - book p221 - split-blocks. **the perfect telescope - davetrott** - you can build this telescope this is a six inch dobsonian reflector. many ordinary people have built simple telescopes like this. see my homepage at davetrott for pictures of a few of them. **telescope technology the new dobsonian revolution** - the new dobsonian revolution the simplest telescope undergoes a high-tech redesign. by michael e. bakich since the 1960s, when dobson introduced his design, amateurs have found this type of scope easy to make. rick singmaster, owner of starmaster portable telescopes, shows off two telescopes that helped launch the new dobsonian revolution. **dob driver ii by tech2000 by john crilly click to email author** - dobsonian mount is the equatorial platform. these platforms are slightly tilted plates mounted on offset bearings which permit them to swivel through an arc appropriate to cause the telescope to move equatorially. the dobsonian mount is simply placed on top of the platform. the advantages to such platforms include
